Re: *Notice of Ex Parte Presentation*
IBFS File No. SAT-LOA-20190704-00057; Call Sign S3051

Dear Ms. Dortch:

On April 3, 2020, Julie Zoller, Kalpak Gude, Darren Achord, and Mariah Dodson Shuman of Amazon spoke by telephone with Troy Tanner, Jennifer Gilsenan, Jose Albuquerque, Sankar Persaud, Alan Thomas, and Jay Whaley of the Federal Communications Commission's International Bureau.

We expressed our appreciation for the Commission's decision to swiftly conduct a new processing round for non-geostationary orbit fixed-satellite service (NGSO FSS) systems.¹ The need for increased connectivity is more evident than ever. Amazon remains fully committed to Project Kuiper, and this development represents another positive step in our plan to deliver reliable, affordable connectivity to unserved and underserved customers in the United States and around the world.

We look forward to continuing to work with the Commission as it processes our pending license application, for which there is ample support on the record for expeditious grant.

Please contact me with questions about this submission.

Respectfully submitted,

/s/ **Mariah Dodson Shuman**

Mariah Dodson Shuman
Corporate Counsel
Kuiper Systems LLC,
an Amazon subsidiary
